

SUN F

by World Pac

IT'S MORE THAN A CASING!

SUN F FLAT FILM is the alternative choice to collagen. The smokeable fibrous films have a high tear strength, even when wet, and an exceptional machinability. Products can be easily peeled without any residuals and no cross species issues occurring.

THE ORIGINAL

Applications:

- Cooked products
- Cooked hams & cooked ham products
- Poultry products & cold smoked products
- Can be used in combination with solid or elastic netting

Availability:

- Flat film on reels
- 200 meters per reel on 2 inch core
- Smaller reels available upon request
- Sheets
- FW 200 mm up to FW 1000 mm
- Presticking L, XL and XXL

Use/process:

- Manual stuffing horn
- Semi-automatic ham stuffer for example WP LS422
- Automatic collagen film applier for example Polyclip NFA

Advantages:

- Excellent smokeability
- Tender bite, no collagen bite
- Shiny appearance
- No cross species issues due to use of nonedible film
- Very high tear strength, even when wet
- Due to presticking, no sticking needed after stuffing, no air bubbles
- Storage of flat film without refrigeration
